

SQL'de Tarih ve Saat Görünümünün Farklı Formata Dönüştürülmesi

SQL'de tarih saat görünümü sorgulara aşağıdaki ilgili değer verilerek istenen formatın görünümü sağlanabilir.

DEĞER	SORGU	Tarih Formatı
1	<code>select convert(vchar, getdate(), 1)</code>	12/30/06
2	<code>select convert(vchar, getdate(), 2)</code>	06.12.30
3	<code>select convert(vchar, getdate(), 3)</code>	30/12/06
4	<code>select convert(vchar, getdate(), 4)</code>	30.12.06
5	<code>select convert(vchar, getdate(), 5)</code>	30-12-06
6	<code>select convert(vchar, getdate(), 6)</code>	30 Dec 06
7	<code>select convert(vchar, getdate(), 7)</code>	Dec 30, 06
10	<code>select convert(vchar, getdate(), 10)</code>	12-30-06
11	<code>select convert(vchar, getdate(), 11)</code>	06/12/30
12	<code>select convert(vchar, getdate(), 12)</code>	061230
23	<code>select convert(vchar, getdate(), 23)</code>	2006-12-30
101	<code>select convert(vchar, getdate(), 101)</code>	12/30/2006
102	<code>select convert(vchar, getdate(), 102)</code>	2006.12.30
103	<code>select convert(vchar, getdate(), 103)</code>	30/12/2006
104	<code>select convert(vchar, getdate(), 104)</code>	30.12.2006
105	<code>select convert(vchar, getdate(), 105)</code>	30-12-2006
106	<code>select convert(vchar, getdate(), 106)</code>	30 Dec 2006
107	<code>select convert(vchar, getdate(), 107)</code>	Dec 30, 2006
110	<code>select convert(vchar, getdate(), 110)</code>	12-30-2006
111	<code>select convert(vchar, getdate(), 111)</code>	2006/12/30
112	<code>select convert(vchar, getdate(), 112)</code>	20061230
